Backend Development | PHP, Laravel

Project Tracking Software | Jira, Trello

Soft Skills | Team player, Leadership, Time management

EXPERIENCE

Aamra Infotainment Ltd

Location: Safura Tower, 20 Kemal Ataturk Ave, Dhaka 1213

Job Title: Junior Software Developer | Sep 2023 - PRESENT

PROJECTS

Project Name : Baffasoft — (Present)

Employer : Aamra Infotainment Ltd

Technology : Laravel, Vue JS

We are 4 developers who are making software for BAFFA. As a full-stack developer at Aamra, my contributions spanned the Leave Management, Payroll Management System, Arbitration Management and Profile features, ensuring seamless integration and robust functionality for the Bangladesh Freight Forwarders Association.

Project Name : Baffa Inventory

Employer : Aamra Infotainment Ltd

Technology : Laravel

I developed a robust asset and inventory management software for Baffa Company using Laravel. This system streamlines asset tracking, enhances inventory control, and provides real-time updates, ensuring efficient and accurate management of company resources.

BSc in Computer Science &
Engineering

Jan 2020 - Dec 2023

**Al Amin Academy School
& College**

Higher Secondary
Certificate(HSC)

Jul 2016 - Jun 2018

**Rampur Bazar Mozidia
High School**

Secondary School
Certificate(SSC)

2016

Project Name : Service Management Software — (Present)

Employer : Aamra Infotainment Ltd

Technology : Laravel

Built service management system with Admin, Engineer, and Customer roles. Admin schedules appointments assigns engineer, and tracks engineer location. The customer views the appointment status. Product warranty tracked for servicing.

Project Name : Labid Hospital

Employer : Aamra Infotainment Ltd

Technology : Laravel

I have had the opportunity to add some new features to this site. These features are not available on the main website. We are just adding new features from the Aamra Infotainment Ltd. development site.

Project Name : Decormakers

Technology : Reactjs

This is an e-commerce website for furniture items. I have kept all features like login, registration, add to cart, increment and decrement cart items, displaying total cart items and amount, and checkout page. Through this project, I have learned a lot of things, such as proper knowledge of redux-toolkit, react-router, authentication, and many more.
